## Students get higher grades and achieve more when engaged with the library

A new report from ACRL says that academic libraries enhance student learning and are key to student success. Students who received library instruction in their initial course work and used the library had higher GPAs and retention levels than those who did not. In addition, students who participated in one-on-one or small group research assistance with a librarian were more confident and performed better on course assignments.

## Wikipedia Library

### Now editors can automatically add citations to WorldCat resources from within Wikipedia

DUBLIN, Ohio, 11 May 2017—OCLC and the Wikimedia Foundation's Wikipedia Library are working together to make it easy for editors to link citations in Wikipedia to millions of library materials represented in WorldCat, the world's most comprehensive database of information about library collections.

References and reliable sources help Wikipedia editors verify facts included in articles. They also provide additional resources that might be of interest to readers who want to delve deeper into research topics. However, adding references has not always been easy, and often required cutting and pasting or re-typing information.

The ability to generate citations has improved significantly and now Wikimedia's cite tool, a companion to its visual editing interface, allows editors to generate a full citation from a single identifier. The integration of OCLC's WorldCat Search API into the cite tool helps editors automatically generate and add citations that link back to resources represented in WorldCat.

### IFLA Green Library Award 2017

Applications for the IFLA Green Library Award are due by 30 May 2017. Any outstanding Green Library project, initiative or idea may apply, and details can be found on the IFLA website.

#### What is a Green Library?

The consideration of the role of humanity in climate change and the notion of sustainable development are core concerns of society, and consequently of libraries."

### "Research Data Management in Academic Institutions: A Scoping Review"

Posted: 24 May 2017 05:30 AM PDT

Laure Perrier et al. have published "Research Data Management in Academic Institutions: A Scoping Review" in PLOS ONE. Here's an excerpt: Interest in research data management in the global community is on the rise. Recent activity has included the Bill & Melinda Gates Foundation moving their open access/open data policy, considered to be exceptionally strong, [...]

## The Realities of Research Data Management

The Realities of Research Data Management is a four-part series that explores how research universities are addressing the challenge of managing research data throughout the research lifecycle. Research data management (RDM) has emerged as an area of keen interest in higher education, leading to considerable investment in services, resources and infrastructure to support researchers' data management needs.
